INITIMATION PURSUANT TO REGULATION-30

Gorani Industries Limited is delighted to inform that the Company has started manufacturing the most hi-tech model in the range hood segment. The Company has completed the testing and production of initial lot of two models of such hi-tech range hood named RH: 009 and RH 010. The images of such hi-tech range hood are attached below.

Such models come with an auto open feature of downward moving and flip moving mechanism. The Company by far is the only manufacturing unit in the Country which is able to assemble the said models in house. The models being high end will give a good push to the Company in market as the market in India is moving towards high end and designer range hoods.

Further, with the coming winter season, the Company has received a preliminary order of 3000 gas geysers in the first month of the season. Due to which as against the month of April, this month will see an increase of 15% in terms of production in units. Also, the Company is more focusing on the ODS technology while producing gas geyser models for advanced safety
